H-P PRODUCTS INTRODUCES THE VACUFLO 466Q® TO ITS QUIET SERIES OF HIGH-PERFORMING CENTRAL VACS

The 466Q Is Designed for Homes Up to 5,000 Square Feet

LOUISVILLE, OH – February 2005 – H-P Products introduces the VACUFLO 466Q® to its quiet series of True Cyclonic® high-performing central vacuum systems. Debuting in 2004 with the 566Q® (for homes up to 8,000 square feet), the VACUFLO Quiet Series includes the quietest systems available in the central vac market. Serving as a smaller adaptation of the 566Q, the 466Q is intended for homes up to 5,000 square feet.

Expanding the line to suit homes of all sizes, the VACUFLO True Cyclonic Quiet Series not only offers whole-house cleaning convenience and maximum vacuum power, but the quiet operation allows the homeowner to vacuum anytime, day or night. Specifically engineered and custom installed for each home, users can rely on the cost efficient 466Q to deliver a more tranquil and peaceful cleaning experience.

With the patented sound-absorbing Foam Silencer, the 466Q offers users high-performing central vac features with an extremely low noise performance of only 59.7 dBa. The motor, strategically placed to minimize the sound production while sustaining maximum cleaning power, offers impressive performance with a measurement of 477 maximum air watts of cleaning potential.

VACUFLO uses its patented Cyclonic Filtration Technology™ that operates without bags and provides the homeowner with a system that will maintain maximum cleaning power for the duration of use. Units that require bags will suffer a measurable decrease in suction power and airflow within the first use as dirt and dust begin to accumulate. VACUFLO's True Cyclonic power units eliminate 100% of all vacuumed dirt, odors and allergens from the home while maintaining superior suction. Powerful cyclonic action separates the dirt from the air and forces 96-98% of all vacuumed elements through a simple network of in-wall tubing and then is

deposited into the clear dirt canister while the remaining fine dust particles are exhausted outdoors. The in-wall tubing is easily installed during construction or can be added to an existing home in less than one day with no structural modifications needed.

Recommended for use in homes up to 5,000 square feet, the 466Q is installed with a Limited Lifetime Warranty plus 3 years labor to ensure the homeowner's complete satisfaction. The VACUFLO 466Q offers consumers powerful cleaning performance and reliability with impressively quiet operation; satisfying the cleaning and convenience needs of all homeowners.

VACUFLO® central vacuum systems, manufactured by H-P Products, Inc. provide a whole-house cleaning solution for health conscious homeowners.
