VACUFLO TURNS FIFTY

ORLANDO, FL – January 13 – 16, 2005 – Booth # W4189 – In 2005 H-P Products, Inc. will celebrate 50 years as the premier manufacturer of the VACUFLO® line of high-performance central vacuum systems. In 1955, H-P Products launched the VACUFLO® True Cyclonic™ line, a built-in residential central vacuum system that requires no bags or filters. Since its inception, VACUFLO has revolutionized the central vac market by developing unparalleled technology and increasing product power, performance and durability.

Only VACUFLO uses patented Cyclonic Filtration Technology™ that eliminates 100% of all vacuumed dirt, odors and allergens from the home. The VACUFLO system works by transporting dirt, debris and dust particles through a simple network of tubing that runs through the walls. Approximately 96-98% of the dirt is deposited into the remote canister while the remaining fine dust particles are exhausted outdoors or caught in the filter cartridge so that dirt and odors are not re-circulated into the living area.

VACUFLO has earned a worldwide reputation for quality products by expanding its presence in the U.S. and Canada, as well as exporting to new markets such as South America, Africa, Germany, Austria, Japan, Italy, Australia, Belgium, Russia and China. Besides market expansion, VACUFLO products have continually evolved and expanded to meet the changing needs of a growing customer base.

H-P Products expanded its reach in the market by introducing Royal Appliance and Dirt Devil® branded central vacuum systems in 2001. Moving forward, H-P Products will continue to introduce innovative products that accommodate a variety of applications while maintaining their focus on the healthy home market.
